

FieldCollection

Introduced in build 8.4

Description

The `FieldCollection` class contains a list of `PivotTableField` objects. To get a `FieldCollection` object, use `PivotTable.ColumnLabels`, `PivotTable.DataFields`, `PivotTable.RowLabels`, or `PivotTable.PageFields`.

C#

```
public sealed class FieldCollection
```

vb.net

```
Public NotInheritable Class FieldCollection
```

Properties

Name	Description
<code>Count</code>	Returns the number of <code>PivotTableFields</code> in the collection.

Indexers

Name	Description
<code>Item(Int32)</code>	Returns the <code>PivotTableField</code> at the specified index.
<code>Item(String)</code>	Returns the <code>PivotTableField</code> with the specified name.

Methods

Name	Description
<code>CreateField</code>	Creates a new <code>PivotTableField</code> of the appropriate type in a <code>FieldCollection</code>
