Workbook.TabRatio

Description

Sets or returns the ratio between the workbook's tab bar and the horizontal scroll bar.

C#

```csharp
public double TabRatio{ get; set; }
```

vb.net

```vbnet
Public Property TabRatio() As Double
```

Remarks

For example, if TabRatio is set to 50, the tab bar will take up 50% of the width of the workbook window, while the horizontal scroll bar will take up the other half.The value of `TabRatio` should be between 0 and 100. If the value is less than 0, ExcelWriter will set `TabRatio` to 0. If the value is greater than 100, ExcelWriter will set `TabRatio` to 100.

Examples

C#

```csharp
        //--- Get the ratio between the workbook's tab bar and the horizontal scroll
bar
        double ratio = wb.TabRatio;

        //--- Set the ratio between the workbook's tab bar and the horizontal scroll
bar
        wb.TabRatio = 20;
```

vb.net

```vbnet
        '--- Get the ratio between the workbook's tab bar and the horizontal scroll
bar
        Dim ratio As Double = wb.TabRatio

        '--- Set the ratio between the workbook's tab bar and the horizontal scroll
bar
        wb.TabRatio = 20
```
