Workbook.Item(String)

Description

Returns the worksheet with the specified name. This property is an indexer for the Workbook class.

C#

```csharp
public Worksheet this[System.String sheetName] { get; }
```

vb.net

```vbnet
Public Default ReadOnly Property Item(ByVal sheetName As String) As Worksheet
```

Parameters

name
The name of the worksheet.

Returns

The worksheet with the specified name.

Examples

C#

```csharp
        //--- Get the worksheet titled "Sheet1"
        Worksheet ws = wb["Sheet1"];
```

vb.net

```vbnet
        '--- Get the worksheet titled "Sheet1"
        Dim ws As Worksheet = wb("Sheet1")
```
