

SeriesDataLabel.ContainsValue

Description

Sets or returns whether the data label will contain the actual (y) value for the data point.

C#

```
public boolean ContainsValue{ get; set; }
```

vb.net

```
Public Property ContainsValue() As Boolean
```

Remarks

This defaults to false when creating a new Series.

The data label is considered disabled if this and [ContainsBubbleSize](#), [ContainsCategoryName](#), [ContainsSeriesName](#), and [ContainsValueAsPercentage](#) are all false.

If the series category type is a scatter or bubble chart, then this property corresponds to the 'Y Value' option under 'Label Contains' in Excel.
