

Worksheet.DeleteRow(Int32)

Description

Deletes a specified row and its contents from the worksheet. Rows below the deleted row will be moved up.

C#

```
public void DeleteRow(int rowNumber)
```

vb.net

```
Public Sub DeleteRow(ByVal rowNumber As Integer)
```

Parameters

rowNumber

The 0-based number of the row to remove.

Examples

C#

```
ws.DeleteRow(70);
```

vb.net

```
ws.DeleteRow(70)
```
