# Cell.GetCharacters(Int32, Int32)

## **Description**

Returns a CharacterRun object representing a range of characters within the cell. Use this method to set the font on specified characters within the cell.

C#

public CharacterRun GetCharacters(int startIndex, int length)

#### vb.net

Public Function GetCharacters(ByVal startIndex As Integer, ByVal length As Integer) As CharacterRun

### **Parameters**

#### startIndex

The character position at which to begin the character run.

#### length

The length of the character run.

### **Returns**

A CharacterRun object representing a range of characters within the cell.

# **Examples**

C#

CharacterRun charRun = cellAl.GetCharacters(0, 6);

vb.net

Dim charRun As CharacterRun = cellAl.GetCharacters(0, 6)
