Area.Item(Int32, Int32)

Description

Returns a cell within the specified area of cells.

C#

```
public Cell this[int row, int col] { get; }
```

---

vb.net

```
Public Default ReadOnly Property Item(ByVal row As Integer, ByVal col As Integer) As Cell
```

Parameters

row

The cell's 0-based row number, relative to the first cell in the area. For example, for the area B4:E7, `area[0,0]` will return cell B4.

col

The cell's 0-based column number, relative to the first cell in the area. For example, for the area B4:E7, `area[0,0]` will return cell B4.

Returns

A Cell object representing the cell. If the cell is not within the specified area, an exception will be thrown.

Examples

C#

```
Cell c = ar[5,5];
```

---

vb.net

```
Dim c As Cell = ar(5, 5)
```
