

Shapes.Remove(Int32)

Description

Removes the [Shape](#) object at the specified position from the collection. The position will correspond to the position of the `Shape` within the array returned by [ListShapes](#).

C#

```
public void Remove(int position)
```

vb.net

```
Public Sub Remove(ByVal position As Integer)
```

Parameters

position

The 0-based position of the `Shape` to remove.
