

Anchor.OffsetX

Description

Returns the X offset from the left side of the column containing the anchor, as a percentage of column width.

C#

```
public double OffsetX{ get; }
```

vb.net

```
Public ReadOnly Property OffsetX() As Double
```

Remarks

An offset of 100.0 represents an anchor flush with the right side of the column.

Examples

C#

```
double x = anc.OffsetX;
```

vb.net

```
Dim x As Double = anc.OffsetX
```
