

DataImportProperties.TruncateRows

Description

Sets or returns whether imported data rows will be truncated if the number of rows imported exceeds the number of target rows in the spreadsheet.

C#

```
<p> public boolean TruncateRows{ get; set; }</p>
```

vb.net

```
<p>Public Property TruncateRows() As Boolean</p>
```

Examples

C#

```
//--- Get TruncateRows
    bool truncateRows = importProps.TruncateRows;

    //--- Set TruncateRows
    importProps.TruncateRows = true;
```

vb.net

```
'--- Get TruncateRows
    Dim truncateRows As Boolean = importProps.TruncateRows

    '--- Set TruncateRows
    importProps.TruncateRows = True
```
