

BorderPart.Color

Description

Sets or returns the color of the border, as an ExcelWriter [Color](#) object. If multiple colors were assigned to border parts, `Color` will return the color of the top border.

C#

```
public Color Color{ get; set; }
```

vb.net

```
Public Property Color() As Color
```

Examples

C#

```
//--- Get Color  
Color c = bp.Color;  
  
//--- Set Color  
bp.Color = wb.Palette.GetClosestColor(System.Drawing.Color.Blue);
```

vb.net

```
'--- Get Color  
Dim c As Color = bp.Color  
  
'--- Set Color  
bp.Color = wb.Palette.GetClosestColor(System.Drawing.Color.Blue)
```
