ChartRegion.Y

Description

Sets or returns the y coordinate of the upper left corner of the chart region, in units of 1/4000 of the chart area.

C#

```
public int Y{ get; set; }
```

vb.net

```
Public Property Y() As Integer
```

Remarks

For SeriesDataLabel and Trendline labels, the origin for the Y coordinate is relative to the default location of the data label.

If a value is set that is outside the range of 0 through 4000 inclusive, the value will be adjusted to be within that range.
