

Cells.Item

Overload	Description
<code>Item(Int32, Int32)</code>	Represents a single cell in a Cells collection. Item is the indexer of the <code>Cells</code> collection, so <code>Cells[0, 0]</code> is equivalent to <code>Cells.Item[0, 0]</code> .
<code>Item(String)</code>	Represents a single cell in a Cells collection. Item is the indexer of the <code>Cells</code> collection, so <code>Cells["A1"]</code> is equivalent to <code>Cells.Item["A1"]</code> .
