Shape.GetCharacters(Int32, Int32)

Description

Returns a CharacterRun object representing a range of characters within the comment text. Use this to set the font on specified characters within the text.

C#

```
public virtual CharacterRun GetCharacters(int startIndex, int length)
```

---

vb.net

```
Public Overridable Function GetCharacters(ByVal startIndex As Integer, ByVal length As Integer) As CharacterRun
```

Parameters

startIndex

The character position at which to begin the character run.

length

The length of the character run.

Returns

A `CharacterRun` object representing a range of characters within the cell.
