

Worksheet.PopulatedCells

Description

Returns a rectangular area of cells from the first (top, left) populated cell to the last (bottom, right) populated cell in the worksheet. The area returned will include cells that contain no data but have been formatted.

C#

```
public Area PopulatedCells{ get; }
```

vb.net

```
Public ReadOnly Property PopulatedCells() As Area
```

Examples

C#

```
Area a = ws.PopulatedCells;
```

vb.net

```
Dim a As Area = ws.PopulatedCells
```
