

Cell.Value

Description

Sets or returns a cell value. Empty cells will return either null or empty string.

C#

```
public System.Object Value{ get; set; }
```

vb.net

```
Public Property Value() As Object
```

Examples

C#

```
//--- Get Value
Object cellValue = cellA1.Value;

//--- Set Value
cellA1.Value = "value";
```

vb.net

```
'--- Get Value
Dim cellValue As Object = cellA1.Value

'--- Set Value
cellA1.Value = "value"
```
