

PivotTable

Introduced in build 8.4

Description

A `PivotTable` object represents a PivotTable in a worksheet and allows the PivotTable to be managed.

C#

```
public sealed class PivotTable
```

vb.net

```
Public NotInheritable Class PivotTable
```

Remarks

To create a `PivotTable` object, call `PivotTables.CreatePivotTable(Area, Int32, Int32)`.

Properties

Name	Description
ChangeDataSource(Area)	Changes the data source of the <code>PivotTable</code> to a new Area .
ColumnLabels	Returns a FieldCollection object representing a list of column labels in a PivotTable. The items in the collection are <code>PivotTableFields</code> of type <code>ColumnLabel</code> .
