

PivotTables

Introduced in build 8.4

Description

The [PivotTables](#) collection represents the set of PivotTables in a worksheet. To return a PivotTables collection, use [PivotTables](#).

C#

```
[DefaultMember("Item")]
public sealed class PivotTables: System.Collections.Generic.IEnumerable<PivotTables>
```

vb.net

```
<DefaultMember("Item")> _
Public NotInheritable Class PivotTables
    Implements System.Collections.Generic.IEnumerable(Of PivotTable)
```

Properties

Name	Description
Count	Returns the number of PivotTables in the worksheet.

Indexers

Name	Description
Item(Int32)	Returns the PivotTable at the specified 0-based position in the PivotTables collection.
Item(String)	Returns the PivotTable with the specified name in the PivotTables collection.

Methods

Name	Description
CreatePivotTable(Area, Int32, Int32)	Creates a new, blank PivotTable for the specified area. A PivotTable created by this method is part of PivotTables collection.
CreateConsolidatedPivotTable(IEnumerable, Int32, Int32)	Creates a new PivotTable for multiple consolidated ranges. A PivotTable created by this method is part of PivotTables collection.
GetEnumerator()	Returns an IEnumerator for the PivotTables in a Worksheet.
