

# Worksheet.DeleteColumn(Int32)

## Description

Deletes a column and its contents from the worksheet. Columns after the deleted column will be moved to the left.

**C#**

```
public void DeleteColumn(int columnNumber)
```

**vb.net**

```
Public Sub DeleteColumn(ByVal columnNumber As Integer)
```

## Parameters

***columnNumber***

The 0-based number of the column to remove.

## Examples

**C#**

```
ws.DeleteColumn(9);
```

**vb.net**

```
ws.DeleteColumn(9)
```
