

PivotTableSettings.RefreshOnOpen

Introduced in build 8.4

Description

Sets or returns whether Microsoft Excel will automatically refresh a PivotTable and the PivotTable cache when Excel opens the document.

C#

```
public boolean RefreshOnOpen{ get; set; }
```

vb.net

```
Public Property RefreshOnOpen() As Boolean
```

Examples

C#

```
ExcelApplication xla = new ExcelApplication();  
Workbook wb = xla.Open(@"C:\MySpreadsheet.xlsx");  
Worksheet ws = wb.Worksheets[0];  
ws.PivotTables[0].PivotTableSettings.RefreshOnOpen = true;
```

vb.net

```
Dim xla As New ExcelApplication()  
Dim wb As Workbook = xla.Open("C:\MySpreadsheet.xlsx")  
Dim ws As Worksheet = wb.Worksheets(0)  
ws.PivotTables(0).PivotTableSettings.RefreshOnOpen = true;
```

Remarks

RefreshOnOpen is false by default.

When creating or modifying a PivotTable with ExcelWriter, make sure to set this property to see the changes. If this property is not set in code or in a template, the PivotTable will not reflect changes made with ExcelWriter code.

Setting RefreshOnOpen is the same as going to *PivotTable Options > Data* and checking or unchecking *Refresh data when opening the file*.
