

SharePointIntegration.Open(ExcelTemplate, Microsoft.SharePoint.SPListItem, String)

Introduced in build 7.1.0.1855

Description

Opens a spreadsheet from a SharePoint List Item.

C#

```
public static void Open(this ExcelTemplate template, Microsoft.SharePoint.SPListItem listItem, String fileName)
```

vb.net

```
Public Shared Sub Open(ByVal template As ExcelTemplate, ByVal listItem As Microsoft.SharePoint.SPListItem, ByVal fileName As String)
```

Parameters

template

The current ExcelTemplate object which is opening the file

listItem

SharePoint List Item to which the file is attached

fileName

The name of the file to open. The file must be a BIFF8 format (Excel 97 or later) .xls or .xlt file or an OOXML format .xlsx, .xlsm, .xltx, or .xltn file.

Exceptions

ArgumentNullException

[Open](#) will throw this exception if `null` (C#) or `Nothing` (VB.NET) is passed to the method.

ArgumentException

Remarks

This is an extension method for the ExcelTemplate object to be used for opening spreadsheets from SharePoint List Items. To use this method, you must add a reference to SoftArtisans.OfficeWriter.ExcelWriter.SharePointIntegration.dll
