

SeriesDataLabel.ContainsBubbleSize

Description

Sets or returns whether the data label will contain the bubble size. This will only be displayed in bubble charts.

C#

```
public boolean ContainsBubbleSize{ get; set; }
```

vb.net

```
Public Property ContainsBubbleSize() As Boolean
```

Remarks

This defaults to false when creating a new Series.

The data label is considered disabled if this and [ContainsCategoryName](#), [ContainsSeriesName](#), [ContainsValue](#), and [ContainsValueAsPercentage](#) are all false.

If the series category type is not a bubble chart, this has no effect.
