

Worksheet.UngroupRows(Int32, Int32)

Description

Ungroups a contiguous set of rows.

C#

```
public void UngroupRows(int startRowIndex, int numRows)
```

vb.net

```
Public Sub UngroupRows(ByVal startRowIndex As Integer, ByVal numRows As Integer)
```

Parameters

startRowIndex

The 0-based index of the starting row.

numRows

The number of rows to ungroup.

Examples

C#

```
ws.UngroupRows(0, 15);
```

vb.net

```
ws.UngroupRows(0, 15)
```
