Units

Description

The different types of units used by WordWriter

C#

```
public enum Units
```

vb.net

```
public Enum Units
```

Remarks

Not all units are supported by all methods/properties, check the documentation before selecting units.

Values

Name	Description
Null	Default unit; associated size is ignored
Auto	Size is automatically chosen; associated size is ignored
Percent	Size is measured as a percent of the total available width
Twips	Size is measured in twips
