

ColumnProperties.OutlineLevel

Description

Sets or returns the outline level of the column, as a value between 0 and 7. The outline level is used to control grouping in Excel. For example, to group several columns, set their outline levels to 1; to group a subset of columns within the group, set their outline levels to 2.

C#

```
public int OutlineLevel{ get; set; }
```

vb.net

```
Public Property OutlineLevel() As Integer
```

Examples

C#

```
int groupLevel = colProps.OutlineLevel;  
    colProps.OutlineLevel = 4;
```

vb.net

```
Dim groupLevel As Integer = colProps.OutlineLevel  
    colProps.OutlineLevel = 4
```
