

Worksheet.Charts

Description

Returns a [Charts](#) collection containing all the charts contained as objects within this worksheet. Use this collection to add, access, and remove charts from the worksheet.

C#

```
public Charts Charts{ get; }
```

vb.net

```
Public ReadOnly Property Charts() As Charts
```

Examples

C#

```
Charts allCharts = ws.Charts;
```

vb.net

```
Dim allCharts As Charts = ws.Charts
```
