Worksheet.Visibility

Description

Sets or returns the visibility setting of the worksheet.

C#

```csharp
public SheetVisibility Visibility{ get; set; }
```

---

vb.net

```vbnet
Public Property Visibility() As SheetVisibility
```

Examples

C#

```csharp
//--- Get Visibility
        Worksheet.Visibility vis = ws.Visibility;

        //--- Set Visibility
        ws.Visibility = Worksheet.SheetVisibility.Hidden;
```

---

vb.net

```vbnet
'--- Get Visibility
        Dim vis As Worksheet.Visibility = ws.Visibility

        '--- Set Visibility
        ws.Visibility = Worksheet.SheetVisibility.Hidden
```
