

Document.DatePrinted

Description

Returns a `DateTime` object representing the date this document was last printed using Word.

C#

```
public System.DateTime DatePrinted{ get; }
```

vb.net

```
Public ReadOnly Property DatePrinted() As Date
```

Remarks

MS Word equivalent: File menu > Properties > Statistics tab > Printed:

Examples

C#

```
DateTime oDateTime = oDocument.DatePrinted;
```

vb.net

```
Dim oDateTime As DateTime = oDocument.DatePrinted
```
