

Hyperlink.Area

Description

Returns the [Area](#) that the [Hyperlink](#) object is associated with. The set of cells that the Area object represents functions as a single hyperlink to the same href.

C#

```
public Area Area{ get; }
```

vb.net

```
Public ReadOnly Property Area() As Area
```

Remarks

If the user clicks anywhere within this Area, they will be taken to the hyperlink's destination.

If the hyperlink has been deleted, this property returns null.

Examples

C#

```
Area linkArea = link.Area;
```

vb.net

```
Dim linkArea As Area = link.Area
```
