# Style.Orientation

## Description

Sets or returns the angle that text is displayed at, as a value between -90 and 90.

### C#

```
<p> public int Orientation{ get; set; }</p>
```

### vb.net

```
<p>Public Property Orientation() As Integer</p>
```

## Examples

### C#

```
//--- Get Orientation
        int orient = styl.Orientation;

        //--- Set Orientation
        styl.Orientation = 45;
```

### vb.net

```
'--- Get Orientation
        Dim orient As Integer = styl.Orientation

        '--- Set Orientation
        styl.Orientation = 45
```
