

# Range.FirstCellStyle

## Description

Returns the style for the first cell in the range. Changes to this style will apply only to the first cell. To assign this style to the entire [Range](#), set [Range.SetStyle\(\)](#) to this [Style](#) reference.

**C#**

```
public Style FirstCellStyle{ get; }
```

**vb.net**

```
Public ReadOnly Property FirstCellStyle() As Style
```

## Examples

**C#**

```
Style firstStyle = rng.FirstCellStyle;
```

**vb.net**

```
Dim firstStyle As Style = rng.FirstCellStyle
```
