

DocumentProtection.DocumentProtected

Description

Sets or returns a protection level for the document. Possible values are: None, TrackChanges, Comments, Forms, and ReadOnly.

C#

```
public ProtectionLevel DocumentProtected{ get; set; }
```

vb.net

```
Public Property DocumentProtected() As ProtectionLevel
```

Examples

C#

```
//--- Get ProtectionLevel
DocumentProtection.ProtectionLevel level = docProtect.DocumentProtected;

//--- Set ProtectionLevel to allow editing of Forms only
docProtect.DocumentProtected = DocumentProtection.ProtectionLevel.Comments;
```

vb.net

```
'--- Get ProtectionLevel
Dim level As DocumentProtection.ProtectionLevel =
docProtect.DocumentProtected

'--- Set ProtectionLevel to allow editing of Forms only
docProtect.DocumentProtected = DocumentProtection.ProtectionLevel.Comments
```
