

ListEntry.LevelNum

Description

Sets or returns an `int` representing the indent level for this list entry.

C#

```
public int LevelNum{ get; set; }
```

vb.net

```
Public Property LevelNum() As Integer
```

Examples

C#

```
//--- Return LevelNum
    int levelNum = entry.LevelNum;

    //--- Set LevelNum to 4th level
    entry.LevelNum = 3;
```

vb.net

```
'--- Return LevelNum
    Dim levelNum As Integer = entry.LevelNum

    '--- Set LevelNum to 4th level
    entry.LevelNum = 3
```
