TableCell.VerticalMerged

Description

Returns or sets a `boolean` that represents if this cell is merged with one or more cells vertically. The first cell will contain all the content.

C#

```
public boolean VerticalMerged{ get; set; }
```

vb.net

```
Public Property VerticalMerged() As Boolean
```

Examples

C#

```
//--- Return VerticalMerged
        bool merged = cell.VerticalMerged;

        //--- Set VerticalMerged
        cell.VerticalMerged = true;
```

vb.net

```
'--- Return VerticalMerged
        Dim merged As Boolean = cell.VerticalMerged

        '--- Set VerticalMerged
        cell.VerticalMerged = True
```
