

Workbook.Height

Description

Sets or returns the height of the workbook's window

C#

```
public int Height{ get; set; }
```

vb.net

```
Public Property Height() As Integer
```

Examples

C#

```
//--- Get the height of the workbook window
int winHeight = wb.Height;

//--- Set the height of the workbook window
wb.Height = 500;
```

vb.net

```
'--- Get the height of the workbook window
Dim winHeight As Integer = wb.Height

'--- Set the height of the workbook window
wb.Height = 500
```
