Workbook.Height

Description

Sets or returns the height of the workbook's window

C#

```csharp
public int Height{ get; set; }
```

vb.net

```vbnet
Public Property Height() As Integer
```

Examples

C#

```csharp
//--- Get the height of the workbook window
        int winHeight = wb.Height;

        //--- Set the height of the workbook window
        wb.Height = 500;
```

vb.net

```vbnet
'--- Get the height of the workbook window
        Dim winHeight As Integer = wb.Height

        '--- Set the height of the workbook window
        wb.Height = 500
```
