

# Area.WorksheetIndex

## Description

Returns the 0-based index of the worksheet that contains the specified area, or -1 if the worksheet that contained the area doesn't exist anymore.

**C#**

```
public int WorksheetIndex{ get; }
```

**vb.net**

```
Public ReadOnly Property WorksheetIndex() As Integer
```

## Examples

**C#**

```
int sheetNum = a.WorksheetIndex;
```

**vb.net**

```
Dim sheetNum As Integer = a.WorksheetIndex
```
