Area.WorksheetIndex

Description

Returns the 0-based index of the worksheet that contains the specified area, or -1 if the worksheet that contained the area doesn't exist anymore.

C#

```csharp
public int WorksheetIndex{ get; }
```

vb.net

```vbnet
Public ReadOnly Property WorksheetIndex() As Integer
```

Examples

C#

```csharp
int sheetNum = a.WorksheetIndex;
```

vb.net

```vbnet
Dim sheetNum As Integer = a.WorksheetIndex
```
