

Range.JoinRange(Range)

Description

Adds another range to this range.

C#

```
public void JoinRange(Range range)
```

vb.net

```
Public Sub JoinRange(ByVal range As Range)
```

Parameters

range

The range to be added to the current range.

Examples

C#

```
rng.JoinRange(rng2);
```

vb.net

```
rng.JoinRange(rng2)
```
