Worksheet.StandardHeight

Description

Sets or returns the default row height in points (1/72 of an inch). This must be between 0 and 409.

C#

```csharp
public double StandardHeight{ get; set; }
```

vb.net

```vb
Public Property StandardHeight() As Double
```

Examples

C#

```csharp
//--- Get StandardHeight
        ws.StandardHeight = 35;

        //--- Set StandardHeight
        double rowHeight = ws.StandardHeight;
```

vb.net

```vb
'--- Get StandardHeight
        ws.StandardHeight = 35

        '--- Set StandardHeight
        Dim rowHeight As Double = ws.StandardHeight
```

Remarks

The default value of this property in Excel 2003 and earlier is 12.75. In Excel 2007 and later, it is 15.

In general, the default `StandardHeight` depends on the workbook's normal font. If your workbook has a non-default font, the default `Standard Height` will be slightly larger than the size of that font. The default font in Excel 2003 and earlier is 10pt Arial; in Excel 2007 and later it is 11pt Calibri.
