

TableFormatting.DefaultSpacing

Description

Returns or sets an `int` that represents the default spacing between a table's cells that has this formatting. This is the distance in twips between the edge of a cell and the center of its border with an adjacent cell. One twip = (1/20 pt) or (1/1440 in)

C#

```
public int DefaultSpacing{ get; set; }
```

vb.net

```
Public Property DefaultSpacing() As Integer
```

Remarks

By default, this is set to zero (0) for a new table.

Word equivalent: Table menu > Table Properties... > Table tab > Options... button > Default cell spacing section > Allow spacing between cells

Examples

C#

```
//--- Return DefaultSpacing
    int defaultSpacing = oTableFormatting.DefaultSpacing;

//--- Set DefaultSpacing to 1/2 inch
oTableFormatting.DefaultSpacing = 720;
```

vb.net

```
'--- Return DefaultSpacing
    Dim defaultSpacing As Integer = oTableFormatting.DefaultSpacing

'--- Set DefaultSpacing to 1/2 inch
oTableFormatting.DefaultSpacing = 720
```
