

# TableCell.VerticalMerged

## Description

Returns or sets a `boolean` that represents if this cell is merged with one or more cells vertically. The first cell will contain all the content.

**C#**

```
public boolean VerticalMerged{ get; set; }
```

**vb.net**

```
Public Property VerticalMerged() As Boolean
```

## Examples

**C#**

```
//--- Return VerticalMerged
    bool merged = cell.VerticalMerged;

    //--- Set VerticalMerged
    cell.VerticalMerged = true;
```

**vb.net**

```
'--- Return VerticalMerged
    Dim merged As Boolean = cell.VerticalMerged

    '--- Set VerticalMerged
    cell.VerticalMerged = True
```

## Examples
