

Font.UnderlineColor

Description

Sets or returns the underline color for a character run as a [Color](#) object.

C#

```
public System.Drawing.Color UnderlineColor{ get; set; }
```

vb.net

```
Public Property UnderlineColor() As System.Drawing.Color
```

Remarks

MS Word equivalent: Format menu > Font... > Font tab > Underline color:

Examples

C#

```
//--- Return UnderlineTypeColor
    Color oColor = oFont.UnderlineColor;

    //--- Set UnderlineColor
    oFont.UnderlineColor = Color.Blue;
```

vb.net

```
'--- Return UnderlineColor
    Dim oColor As Color = oFont.UnderlineColor

    '--- Set UnderlineColor
    oFont.UnderlineColor = Color.Blue
```
