

PowerPointWriter Learning Center

Getting Started

The tutorials in this section are designed to make getting started with PowerPointWriter quick and easy. They have corresponding downloadable Visual Studio solutions.

Tutorials

Hello World Tutorial

- [Hello World using PowerPointTemplate](#) — PowerPointWriter's PowerPointTemplate approach allows you to write data to a template presentation that contains data markers. The data markers tell PowerPointWriter where to bind specific sets of data. This tutorial will show you the basics of dynamically inserting data into a presentation using PowerPointTemplate by taking custom text from a web form textbox and inserting it into a template file.

Basic Tutorials

- [Project Proposal](#) — The Project Proposal contains information about a new software project, including team members and expected costs. This sample consists of three parts that demonstrate the basics of designing a presentation with PowerPointWriter. By the end of this sample you will be able to create a presentation that takes advantage of the features of both PowerPointTemplate and PowerPointApplication.
- [Employee Training](#) — The New Employee Training is a presentation for a new employee orientation. It includes information such as company history and job expectations. This sample consists of three parts that demonstrate the basics of designing a presentation with PowerPointWriter. By the end of this sample you will be able to create a presentation that takes advantage of the features of both PowerPointTemplate and PowerPointApplication.
