

PowerPointApplication.Open(System.IO.Stream)

Description

Opens the template file from a stream.

C#

```
public void Open(System.IO.Stream stream)
```

vb.net

```
Public Sub Open(ByVal stream As System.IO.Stream)
```

Parameters

stream

The stream to open the file from.

Examples

C#

```
PowerPointApplication ppta = new PowerPointApplication();  
FileStream fStrm = new FileStream(@"C:\Sales\2003\June.pptx",  
FileMode.Open);  
Presentation pres = ppta.Open(fStrm);
```

vb.net

```
Dim ppta As New PowerPointApplication()  
Dim fStrm As FileStream = New FileStream("C:\Sales\2003\June.pptx",  
FileMode.Open)  
Dim pres As Presentation = ppta.Open(fStrm)
```
