

Table.Formatting

Description

Sets or returns a [TableFormatting](#) object representing the formatting of this table (borders, padding, shading, etc).

C#

```
<p> public TableFormatting Formatting{ get; set; }</p>
```

vb.net

```
<p>Public Property Formatting() As TableFormatting</p>
```

Examples

C#

```
//--- Get TableFormatting
    TableFormatting formatting = oTable.TableFormatting;

    //--- Set TableFormatting
    oTable.TableFormatting = oTableFormatting;
```

vb.net

```
'--- Get TableFormatting
    Dim formatting As TableFormatting = oTable.TableFormatting

    '--- Set TableFormatting
    oTable.TableFormatting = oTableFormatting
```
