

List.GetEntry(Int32)

Description

Returns a [ListEntry](#) object representing the entry at a specified index. The index of list entries starts at 0.

C#

```
<p> public ListEntry GetEntry(int index)</p>
```

vb.net

```
<p>Public Function GetEntry(ByVal index As Integer) As ListEntry</p>
```

Parameters

index

An `int` representing the level to get the list entry at.

Returns

A `ListEntry` object representing the entry at a specified index.

Examples

C#

```
ListEntry entry = lst.GetEntry(0);
```

vb.net

```
Dim entry As ListEntry = lst.GetEntry(0)
```
