

DocumentProperties.Company

Description

Sets or returns a `String` that represents any company info added to this file.

C#

```
public System.String Company{ get; set; }
```

vb.net

```
Public Property Company() As String
```

Remarks

MS Word equivalent: File menu > Properties > Summary tab > Company:

Examples

C#

```
//--- Return Company  
string company = docProps.Company;  
  
//--- Set Company  
docProps.Company = "SoftArtisans, Inc.";
```

vb.net

```
'--- Return Company  
Dim company As String = docProps.Company  
  
'--- Set Company  
docProps.Company = "SoftArtisans, Inc."
```
