

DocumentProperties.Keywords

Description

Sets or returns a `String` that represents any keywords that are added to this file.

C#

```
public System.String Keywords{ get; set; }
```

vb.net

```
Public Property Keywords() As String
```

Remarks

MS Word equivalent: File menu > Properties > Summary tab > Keywords:

Examples

C#

```
//--- Return Keywords  
string keywords = docProps.Keywords;  
  
//--- Set Keywords  
docProps.Keywords = "Confidential, Memo";
```

vb.net

```
'--- Return Keywords  
Dim keywords As String = docProps.Keywords  
  
'--- Set Keywords  
docProps.Keywords = "Confidential, Memo"
```
