

WordViewSettings.Zoom

Description

Sets or returns a [WordViewSettings.ZoomType](#) object that represents the zoom type the document will be displayed with when opened by Word. Possible values: None, FullPage, PageWidth).

C#

```
public ZoomType Zoom{ get; set; }
```

vb.net

```
Public Property Zoom() As ZoomType
```

Remarks

This option is set to [None](#) by default.

MS Word equivalent: View menu > Zoom... > Zoom to section

Examples

C#

```
//--- Return DisplayOutlineLevels
int displayOutlineLevels = viewSettings.DisplayOutlineLevels;

//--- Set ZoomType
viewSettings.DisplayOutlineLevels = 4;
```

vb.net

```
'--- Return DisplayOutlineLevels
Dim displayOutlineLevels As Integer = viewSettings.DisplayOutlineLevels

'--- Set DisplayOutlineLevels
viewSettings.DisplayOutlineLevels = 4
```
